EDUCATION

Sri Krishna College of Engineering and Technology
MTech [5 Yr Integrated] Computer Science and Engineering; CGPA:**8.72**

Coimbatore, India
2019-2024

SKILLS SUMMARY

- Programming Skills: Python, Java, SQL, ReactJS, HTML
- Technical Skills: Agile Methodologies, Data Visualizations, ETL, ML Algorithms, DSA, OOPS
- Version control: GitHub

INTERN EXPERIENCE

SDE Intern-Virtusa Consultancy, Chennai

- Contributed to the design and development of an insurance policy portal using React.js, enhancing user experience and interface design.
- Collaborated with cross-functional teams to gather requirements and implement features that streamline the insurance application process.
- Worked as part of the design team, writing scripts for the frontend to optimize application performance.
- Ensured responsiveness across devices and debugged issues to improve overall functionality.
- Utilized Agile methodologies to maintain project timelines and adapt to changing requirements, resulting in increased project efficiency and successful delivery of milestones.

PROJECTS

Gold Price predictor - Python

- Built and deployed a gold price prediction model using Linear Regression, leveraging financial indicators like Crude Oil, USD Index, and S&P 500. Implemented data preprocessing techniques such as feature selection, normalization, and missing value handling to enhance model accuracy.
- Developed an interactive Streamlit web application that enables users to input real-time financial data and receive instant gold price predictions. Evaluated model performance by analyzing prediction accuracy and addressing limitations of time-series financial data.

Corporate banking portal- React.js

- Built a corporate banking portal using React.js, delivering a responsive and user-friendly interface that enabled users to manage accounts, transfer funds, and access key financial services.
- Implemented JSON-based data handling for backend operations, simulating real-time data transactions and enhancing application interactivity without the need for a full backend setup.

Fitness Tracker- Android App

- Designed and developed a fitness tracker application that offers personalized diet plans and structured workout routines, enabling users to stay on top of their health goals.
- Integrated workout and diet tracking features with a user-friendly interface, allowing users to log daily activities and receive tailored fitness suggestions.

CERTIFICATES

- Data Structure and Algorithms Using Java –NPTEL
- Crash course on Python – Google [certificate](#)
- SQL and Relational Databases – IBM [Certificate](#)
- Agile job simulation -JPMorgan chase & co. [Certificate](#)
